

“Blanket” CM Approvals for U.S. Regulatory Asbestos, Hazardous Waste and Lead Courses

The following courses have “blanket” approval for IH CM points, i.e., a CM Approval Number is not needed for the CM Worksheet. Courses can only be counted for CM points one time during a 5 year CM cycle. See the ABIH [CM Handbook](#) for additional details.

Effective 1 January 2010, CM points are assigned at 0.167 points per hour of technical contact time. Combination courses are additive for the CM points (e.g. a combination course of the 16 hour Asbestos Management Planner (2 pts) and the 24 hour Asbestos Inspector (3 pts) will be worth the equivalent of 40 hours (5 pts). Organizations that sponsor/deliver any of the following courses may use this CM point information in their publications.
